FULL STACK DEVELOPER

Full Stack Developer with hands-on experience building web applications, including e-commerce platforms. Strong in backend development, authentication, performance optimization, and frontend design, with a keen focus on clean, responsive, and user-friendly interfaces.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C, HTML, CSS

Frameworks: Express, Tailwind UI, Next.js, Angular

Libraries: React.js, Mongoose

Databases: MongoDB, SQL, Redis

Architecture: MVC, Repository Pattern, Microservices

Dev Tools: Visual Studio Code, Postman, Git, GitHub, Figma

EXPERIENCE

Full stack developer, Intern

Aug 2025 – Present

- Contributed to backend API development, authentication flows, and database design for web applications.
- Worked on frontend features using React and Next.js, focusing on responsive layouts and usability.
- Used Git, Postman, and CI/CD pipelines to develop, test, and deploy application features.

PROJECTS

Healix – Scalable E-Commerce Platform

Source: [Github](#)

Dec 2025 – Present

- Designed and built a **production-grade e-commerce system**, improving API response times by **~35%** through backend optimizations.
- Architected microservices for Auth, Catalog, and Checkout with async communication
- Integrated **Redis caching** and **RabbitMQ** with **background workers**, reducing repeated read latency by **~60%** and smoothing traffic spikes.
- Implemented **JWT-based authentication** with access and refresh tokens stored in **HTTP-only cookies**.
- Developed order processing and inventory workflows, planning atomic updates to prevent overselling.
- Built verified-purchase reviews, admin dashboards, and responsive frontend pages for end-to-end commerce flows.

Tech Stack:

Node.js, Express.js, MongoDB, Next.js, Redis, RabbitMQ, JWT, Workers, REST APIs, TypeScript

JacStudios – Full-Stack E-Commerce Web Application

Source: [Github](#)

- Built a full-featured e-commerce platform with seamless shopping experience and efficient admin management.
- Implemented **session** based authentication product catalogs with search filters and shopping cart features.
- Developed order placement track history and admin dashboard managing products, inventory, categories, orders.

Tech Stack:

Node.js, Express, MongoDB, React, REST APIs

EDUCATION

University of Calicut

August 2022 – 2025

Bachelor of Computer Application

Related Coursework: Database Systems, Computer Science, Software Development

CGPA: 6.3/10
